Reason For Allowance

4. Claims 1-14 are allowed.
5. Following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim 1, which include a light guiding means provided to the mirror portion, for guiding the visible light from the light

source to an objective lens side; wherein the light guiding means is constructed by translucent members that are provided concentrically round the optical axis.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a) Ferguson (US Patent 6,758,564 B2) discloses a line-scan laser ophthalmoscope in figure 2A with teaching of a laser source (item 202) located behind a mirror (item 210), a lens (item 212) and an linear CDD array (item 228); however, Ferguson does not teach or fairly suggest a light guiding means provided to the mirror portion, for guiding the visible light from the light source to an objective lens side; wherein the light guiding means is constructed by translucent members that are provided concentrically round the optical axis.

b) Yamada (US Patent 4,770,523 A) discloses an apparatus for measuring curvature comprising of a objective lens (figure 1, item 6), a light source (figure 1, item 2A), a diaphragm plate (figure 2A, item 5) is provided with a central translucent portion (item 5a) and an annular translucent portion (item 5b), both concentric with the optical axis (1) and an imaging device (figure 1, item 7); however, Yamada does not teach or fairly suggest a light guiding means provided to the mirror portion, for guiding the visible
